SUMMARY

Cybersecurity analyst and CompTIA Security+ certified professional with a background in computer science, chemical engineering, software development, aviation operations, and STEM education. Focused on blue-team cybersecurity, incident response, threat hunting, DFIR, security automation, SIEM workflows, and critical infrastructure security. M.S. Cybersecurity student at Georgia Institute of Technology.

TECHNICAL SKILLS

Security: Incident response, log analysis, threat detection, security automation, IOC analysis, OSINT, SIEM concepts, vulnerability management

Programming: Python, JavaScript, React, Node.js, Express, SQL, HTML/CSS, Bash

Systems: Linux, macOS, Git/GitHub, networking, DNS, virtualization, authentication, access control

Data: Pandas, NumPy, data mining, statistical analysis, machine learning

EDUCATION

M.S. Cybersecurity | Georgia Institute of Technology

- Expected Graduation: 2028

B.S. Computer Science | Louisiana State University Alexandria

- GPA: 3.89/4.0 | Computer Science Club President
- STEM Skills Seminar Host & Presenter | 1st Place Virtual Scholar Day Competition

B.S. Chemical Engineering | McNeese State University

- GPA: 3.42/4.0 | Focus: Math, Chemistry, Biology

CYBERSECURITY & TECHNICAL PROJECTS

Security Automation Toolkit | Python tools for log analysis, failed login detection, IOC parsing, and blue-team workflow automation. Source code available on GitHub.

Portfolio Website | Designed and deployed a responsive React portfolio on Vercel. Source code available publicly on GitHub.

Michaelis University Library | Founded and maintain an educational platform that includes technology and cybersecurity curriculum.

Amber Michaelis

Sandpoint, Idaho

CERTIFICATIONS & TRAINING

CompTIA Security+ | Google Cybersecurity Certificate | Stanford Machine Learning | Georgia Tech Data Structures & Algorithms | CompTIA Network+ (In Progress)

EXPERIENCE

Founder

Michaelis University | Remote | 2026-Present

- Founded and manage an independent educational platform focused on structured courses in technology, cybersecurity, history, political science, and religion.
- Research, write, and publish long-form educational content designed for non-technical and general audiences.
- Build and maintain web content, site structure, course organization, and public-facing educational resources.

Global Flight Operations Scheduling Coordinator

Bristow Group | Louisiana, USA | 2023-2024

- Coordinated global flight-following operations involving aircraft locations, weather conditions, operational communications, and scheduling records.
- Maintained accurate records related to pilots, aircraft, scheduling, and operational status; built experience in monitoring, documentation, escalation, and situational awareness relevant to security operations.

Independent Software Developer

Self-directed / Contract-Based Projects | Remote | 2021-2023

- Built web applications and technical prototypes using JavaScript, React, Node.js, Express, SQL, HTML, and CSS.
- Worked with clients and small organizations to gather requirements, design application features, and implement technical solutions.
- Developed full-stack project experience in authentication, database design, front-end interfaces, back-end routing, and deployment workflows.
- Used Git/GitHub for version control, documentation, and project organization.

Engineering, Physics, and Math Instructor

Lumberton & Bryan Independent School Districts | Texas, USA | 2018-2021

- Taught engineering, physics, mathematics, robotics, programming, chemistry, finance, and STEM courses; designed instructional materials and explained complex technical topics to varied audiences.
